

Pacific Aviation Database Version 3.2.24

A summary of changes in the new database from a user's perspective.

The Home Screen

There is a new search for original c/n.

This is for when an aircraft changes its c/n for whatever reason

The screenshot displays the Pacific Aviation Database Home Screen. On the left, there is a 'SEARCHES' section with various filters and a 'GO' button. A blue callout points to the 'GO' button, stating: 'There is a new search for original c/n. This is for when an aircraft changes its c/n for whatever reason'. The central banner features a large image of a Pacific Aviation aircraft with the text 'PACIFIC AVIATION 2025/2026'. Below the banner, there are links to 'Pacific Aviation Website' and 'Database Wiki', and a table of events. On the right, there is a 'MULTI CRITERIA SEARCH (CURRENT FRAMES)' section with various dropdown menus and a 'GO' button. Below this, there are sections for 'LOGBOOK', 'DATABASE STATISTICS', 'CODE LOOK-UPS', and 'MISCELLANEOUS'. At the bottom, there is a status bar showing the user is logged in as 'Stephen Hambleton' and the version is '3.2.24'.

The Operator search and the Location search (ie Airfield search and Museum search) all lead to the regular search page, but with added reporting views.

The Search Results Screen (Operators)

Although it is not seen on this screenshot, the c/n field now shows additional c/ns to the current one.

Search Results - SINGLE-CLICK "Registration" to preview, DOUBLE-CLICK "Registration" for full details & photos

Most of this is new so it will take time before all the details are available.

In addition to the reg, type and last operator, you will see the year that the aircraft arrived at the storage location, any relevant comments, the last date that the aircraft was noted and a cross-check to highlight if the storage location does not match the aircraft's location (base).

Storage Check List

A PDF check list that you can transfer to a mobile device. Aircraft that you have already seen will be highlighted in green or yellow depending on whether you have made or scrapped the aircraft.

Airport Profile

This report is based on the airlines operating into the selected airport, and the types that they use for the services.

This a new feature and consequently is very light on content.

To begin with airport profiles will be created on request.

Regular aircraft operating to the selected airport

This leads to a screen with more detail on the museum and its residents, including a new feature; which area of the museum can a particular aircraft be found.

Again, this new so it will take while to populate for all museums.

Initially the museums will be addressed by request.

Museum/W&R - Madrid (Cuatro Vientos): Museo del Aire
 The Museum, inaugurated in 1981, is located at the Cuatro Vientos air base and its purpose is the acquisition, conservation and exhibition of the assets that constitute the Historical Heritage of Spanish Aeronautics. Given the number of aircraft it houses, it is ranked among the top five aeronautical museums in Europe.

Aircraft Details Screen

The screenshot shows the Aircraft Details Screen for a Douglas C-47B. The interface includes a top navigation bar with tabs like FAA, Aero Visual, Air Britain, Flightaware, Planespotter, Russian Planes, and RZjets. The main content area is divided into several sections:

- Left Panel:** Contains fields for Registration (N479H), Type (Douglas C-47B), CN (25623 / 14178), Line No, Built (1943), FF (00-00-00), 1st CoA (00-00-43), WFU (15-06-17), Op Unit, Note (Displayed at the side of the Interstate I4/ FL400), Name, Fit No, Code, Other Reg, Hex, SelCal, Spec Marks, Based at, Lat / Long (28.15821754251584, -81.81472155), and Condition (Gate Guard).
- Right Panel:** Features a photo of the aircraft at the Polk City: Fantasy of Flight Museum, a description of the museum's large hangar, and details about the museum entrance, admission (\$15, Seniors \$12), hours (Varies), website (https://www.fantasvofflight.com/), and location (28.168281021038833, -81.8067487771856).
- History Table:** A table showing the aircraft's history with columns for P.I., From, To, Type, Operator, Op Note, WFU, Other Reg, Unit, Code, Aircraft Name, and S. The table lists several operators including US Army Air Force, Royal Air Force, Armstrong-Siddeley Ltd, Skyways, Salmesbury Engineering Ltd, Bahamas Airways, and Seagreen Air Transport.
- Logged as Table:** A table showing the aircraft's logged status with columns for Logged as, Operator, Where, MDPO, Code, Unit, Aircraft, ConNo, and Notes. The table shows the aircraft was logged as N479H by Kermit Weeks at Polk City, FL (FA08) on 28-06-17.
- Bottom Panel:** A table showing the aircraft's flight history with columns for Reg, Date, Flew From, Operator, Flight No, Flight Time, and Sort. The table shows the aircraft was flown from N479H on 28-06-17 by Kermit Weeks.

Callouts highlight the following features:

- Multiple c/ns displayed.
- Link to online data on the model.
- Withdrawn / Cancellation date added.
- Extra data relating to museums added.
- Click on any of the turquoise fields / areas for expanded view and further information.

Miscellaneous

It has not been possible to add outstanding loggings from the Autolog. This has now been fixed.

Several Typos have been corrected

Some field names have been amended for clarity.

Overlap of previous identities, accident record and storage on the Aircraft Full Details page has been fixed.

There possibly several other smaller fixes, but I can't bring everything to mind.
